

Tested in the REAL WORLD

The ID2 Meth Scanner has been tested extensively to validate its accuracy and efficacy as a methamphetamine detector for virtually any quantity, form, or concentration of the drug. The tests listed below were conducted on evidence samples from active or adjudicated court cases (i.e., "street meth"). The Scanner correctly read all 54 samples. Ten of the samples were drugs other than methamphetamine. In one case the Scanner was unable to penetrate the yellow colored container to acquire an adequate target and subsequent identification of the substance.

A SUMMARY OF THE EIGHT TEST PROGRAMS

SPONSOR AGENCY	TEST LOCATION	DATE	NO. OF SAMPLE	SAMPLE WEIGHT	RESULTS	COMMENTS
Greenlee Cty. AZ Sheriff's Dept.	Tucson, AZ	8-8-07	1	39.49g	Meth Positive	Sample was Meth
